Why choose **RAMBO BUILDERS, LLC?**

We understand that for our clients everything hinges on revenue flow and that with a construction project, revenue flow depends on a quality project built on time.

Our job is to help owners and developers of commercial and industrial buildings get their projects built on time so they can begin generating revenue as fast as possible.

What's the hardest thing for the client in the process?

Our greatest success is always with an owner that understands the difference between the lowest initial bid and the lowest overall cost.

There are owners that look for a *bargain* and shop their plans and specs out to multiple contractors in an effort to find the lowest bid.

At the end of this competitive process they seem to have achieved their goals, but unfortunately it is most always a short-lived sense of accomplishment. Delays costing tens of thousands of lost revenue with lease payments due.

Change orders for items surpassing any savings initially intended.

Alternately, I am looking for the owner that sees value in the negotiated approach to construction and will select a contractor based on proven experience, qualified personnel and cost competitiveness and not solely on the lowest overall bid prior to construction.

What kind of jobs do you specialize in?

RAMBO BUILDERS primarily focuses on construction for private industry. We serve multiple commercial and industrial markets including retail, office, warehousing and distribution, recreational & restaurant facilities. Quality, on-time, on-budget, and a team of seasoned professionals who truly care about our clients are what you can expect when you partner with **RAMBO BUILDERS, LLC.**
